Hello Emily,

As requested, BASF has made the necessary changes to the proposed Engenia Herbicide labeling, and in addition has removed the earlier proposed Arkansas and Nebraska collateral labeling.

I have attached a copy of the submitted documents for your convenience. Please note that one possibility for the earlier confusion about the requested changes from you and Lydia, was that the label that was provided back to BASF was based on the 2020 approved Engenia herbicide labeling which did not include the more recently approved changes from March 15, 2022. I think we now have it all sorted out, but if you see anything more that needs to be addressed, please let me know.

Enjoy your weekend,

Jeff
